Date: July 27, 2021

To: Mayor Parris and City Council Members

From: Jeff Hogan, Senior Director - Development Services

Subject: Acceptance of PWCP 16-007 - 2017 Traffic Signal Upgrades

Recommendation:

Accept the work constructed by California Professional Engineering, Inc., for PWCP 16-007, 2017 Traffic Signal Upgrades, and direct the City Clerk to file the Notice of Completion for the project. Retention on this project will be disbursed in accordance with California Public Contract Code.

Fiscal Impact:

\$603,322.20 (including 15% contingency) was awarded based on the original contract. There was one (1) change order totaling \$6,833.76, which brought the total contract cost to \$531,461.76. Sufficient funds were available in Capital Improvements Budget Account Number 323-16TS0029-924. There are no additional maintenance costs associated with this project.

Background:

The City's Traffic Engineering Section regularly surveys the City's traffic signals. This includes both looking at traffic flow and traffic safety. Five (5) locations were identified where adding protected left turns would increase both the traffic flow and safety of those locations: Milling Street/Lancaster Boulevard/Division Street; 10th Street West/Newgrove Avenue; 20th Street West/Avenue J-8; 17th Street East/Avenue J; and 27th Street West/Avenue J. The City subsequently hired a consultant traffic engineer to design the proposed improvements.
